Professional Summary

Computer Engineering student with strong foundation in data analysis, AI technology, and software development with SQL, Python, and machine learning expertise.

Experience

AI/ML Intern

July 2025 – September 2025

InternPro

Remote

- Provided technical support for 50+ IT operations across multiple platforms, ensuring 99% uptime for critical systems.
- Resolved 40+ technical issues in Windows and Linux environments, reducing average resolution time by 30%.
- Enhanced automation processes for 15+ teams resulting in 20% operational efficiency improvement through Python scripts.
- Delivered 5 project milestones ahead of schedule while collaborating with cross-functional teams of 8+ members.

Projects

TWSS - Technical Work for Software and Solutions | *HTML, CSS, JavaScript, Supa Base* January 2024 – March 2024

- Developed technical learning platform providing curated essential concepts across 10+ technology domains including Python, Java, C++, web development, and data structures for aspiring developers.
- Engineered responsive web interface using HTML5, CSS3, and JavaScript delivering structured learning pathways covering 10+ core technical concepts most utilized in respective technology stacks.
- Deployed production website at twss-awe.pages.dev using Cloudflare Pages and Netlify.

Spam Mail Detection System | *Python, Scikit-learn*

June 2024 – August 2024

- Developed machine learning classification model using logistic regression to analyze 10,000+ email records, achieving 94% accuracy rate in spam detection through scikit-learn implementation.
- Engineered data preprocessing pipeline with TF-IDF vectorization, reducing feature dimensionality by 60% while maintaining model performance.
- Conducted statistical analysis using confusion matrix and ROC curves, optimizing hyperparameters to improve precision from 87% to 94%.

Personal Portfolio Website | *HTML, CSS, JavaScript, EmailJS*

September 2024 – October 2024

- Developed professional portfolio website to showcase technical skills and projects using HTML5, CSS3, and JavaScript with responsive design achieving 100% mobile compatibility.
- Integrated EmailJS API for contact form functionality processing 50+ inquiry messages with 100% delivery success rate.
- Implemented modern UI/UX design with smooth animations resulting in average session duration of 3.5 minutes across 200+ visitors.

Education

Chandigarh University

July 2023 – May 2027

Bachelor of Engineering in Computer Engineering, CGPA: 8.3

Mohali, Punjab, India

Technical Skills

Programming Languages: Python, C++, Java, C, JavaScript, PHP, HTML5, CSS3

Database Management: SQL, MySQL, Oracle, Database Design, Query Optimization

Cloud & DevOps: AWS, Cloud Computing, Git, GitHub

AI & Machine Learning: Scikit-learn, Machine Learning Models, Data Analytics, Predictive Analysis

Tools & Platforms: Google Colab, Anaconda, DBeaver, Splunk, SIEM, Linux, Windows

Certifications

Columbia Engineering Introduction to Machine Learning and AI | *Columbia University*

2025

Big Data Analytics with AWS | *Intellipaat*

2025

AWS APAC Solutions Architecture Job Simulation | *Forage*

2025

BCG GenAI Job Simulation | *Forage*

2025

Databases and SQL for Data Science with Python | *IBM*

2025

Introduction to Databases | *Meta*

2024
