SUMMARY

Computer Engineering student at Chandigarh University (CGPA 8.3) who builds web apps and works with Python, FastAPI, SQL, and machine learning. I have built projects end-to-end – from training models to serving them as APIs and building the frontend on top. I like writing clean code and solving real problems.

EXPERIENCE

ML Intern

Jul 2025 – Sep 2025

InternPro

Remote

- Built regression models for wine quality prediction, reaching **85% accuracy**.
- Completed 3 full ML projects in 6 weeks, each with data cleaning, model training, and documentation.

Tutor

Jan 2024 – Mar 2024

Thought Wave Software Solutions

India

- Taught C, C++, SQL, and OOP to **25+ students** across 12 weekly sessions with hands-on exercises.

PROJECTS

Spam Mail Detection | *Python, Scikit-learn, NLTK, FastAPI*

Dec 2025

- Trained a logistic regression model on **10,000+ emails** to detect spam with **94% accuracy**.
- Used TF-IDF to turn email text into features across 5,000+ words; tested on 2,000+ new emails with 93% accuracy.
- Served the model via a **FastAPI** REST endpoint so any app can send an email and get a live prediction.

Handwritten Digit Recognition | *Python, CNN, TensorFlow, FastAPI*

Jan 2026

- Built a CNN model that takes 28×28 pixel grayscale images as input for digit recognition (0–9).
- Applied convolution and ReLU activation to extract spatial features, followed by max pooling for dimensionality reduction.
- Exposed results via **FastAPI** so a frontend or dashboard can fetch and display them easily.

TWSS Learning Platform | *HTML, CSS, JavaScript, FastAPI, Supabase*

Jan – Mar 2024

- Built a full stack learning site covering **10+ topics**; **FastAPI** backend handles login, content, and user progress.
- Used **Supabase** as the database; site is fully mobile-friendly and hosted on Cloudflare Pages with **99.9% uptime**.

Portfolio Website | *HTML, CSS, JavaScript, EmailJS*

- Personal site showing 5+ projects; contact form via EmailJS with 100% delivery; scored **95+ on Google Lighthouse**.

TECHNICAL SKILLS

Frontend: HTML5, JavaScript, Responsive Design

Backend: FastAPI, Python, PHP, REST APIs

Database: SQL, MySQL, Oracle, Supabase

ML & Data: Scikit-learn, K-means, Linear Regression, Logistic Regression, Random Forest, PCA, TF-IDF, Pandas, Numpy, Matplotlib

Tools: AWS, Git, GitHub, Jupyter Notebook, Google Colab, Cloudflare Pages

Other Languages: C, C++, Java

CERTIFICATIONS

- **Data Analysis with Python** – IBM / Cognitive Class, 2026
- **Introduction to Machine Learning** – Columbia University, 2025
- **Big Data Analytics with AWS** – Intellipaat, 2025
- **AWS APAC Solutions Architecture Simulation** – Forage, 2025
- **BCG GenAI Job Simulation** – Forage, 2025
- **Databases and SQL for Data Science with Python** – IBM, 2025

EDUCATION

Chandigarh University

Jul 2023 – May 2027

B.E. in Computer Engineering | CGPA: 8.3

AANM and VVRSR Polytechnic

2021 – 2024

Diploma in Computer Science and Engineering | 90.8%
